

HRISHIKESH CHAUDHARI

Full Stack Developer

+91-9503908995 ✉ hrishikeshc041@gmail.com  linkedin.com/in/hrishikesh-chaudhari-146b1126a  github.com/Hrishikesh9084

Professional Summary

Results-driven Full Stack Developer with strong expertise in building scalable AI-powered web applications using modern frontend and backend technologies. Proven ability to design RESTful APIs, integrate LLM-based systems, and architect secure, production-ready SaaS platforms. Skilled in database design, authentication systems, and cloud deployment with a focus on performance, reliability, and clean engineering practices.

Technical Skills

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Three.js

Backend Technologies: Node.js, Express.js, RESTful APIs

Databases: PostgreSQL, MongoDB, Firebase (Firestore), Vector Databases

Stacks: MERN Stack, PERN Stack

Programming Languages: JavaScript, Python, Java

AI & Data Technologies: Vector Embeddings, Semantic Search, RAG (Retrieval-Augmented Generation)

DevOps & Tools: Git, GitHub, Postman, Docker, Kubernetes, CI/CD Pipelines (GitHub Actions), Vercel, Render

Core Concepts: Data Structures & Algorithms, Authentication & Authorization, API Integration, Scalable System Design

Projects

AI Website Builder | *PERN Stack*

Dec 2025 – Jan 2026

- Engineered an AI-powered website builder using PostgreSQL, Express, React.ts, and Node.js that generates complete websites from user prompts.
- Architected RESTful APIs to manage prompt processing, project generation, and dynamic component rendering.
- Integrated LLM APIs to automatically produce page layouts, UI components, and structured content based on user requirements.
- Implemented a real-time preview editor with React, enabling instant customization of sections, themes, and layouts.
- Established secure authentication, project persistence, and version control using PostgreSQL with optimized relational schema design.
- Deployed the platform using environment-based configuration, CI-friendly workflows, and Git-driven version control practices.
- Preview: make-my-site-ai.onrender.com

UGC.ai – AI-Powered UGC Ads Generator | *PERN Stack*

Jan 2026 – Feb 2026

- Built an AI-powered SaaS platform that generates high-converting UGC-style advertisement videos from product images, model images, and user prompts.
- Orchestrated RESTful APIs to control project workflows, AI script generation, video processing pipelines, and credit-based billing systems.
- Leveraged LLM and generative AI APIs (Google Gemini) for automated ad script creation, media processing, and AI-driven video rendering.
- Constructed an asynchronous video generation pipeline with polling mechanisms, advanced failure handling (503 high demand / 404 model issues), and automated credit recovery logic.
- Integrated secure authentication using Clerk with token-based API authorization and protected backend routes.
- Modeled a scalable PostgreSQL database using Prisma ORM for users, projects, credits, and generation tracking.
- Preview: ugc-ai.onrender.com

Education

B-Tech Computer Science and Engineering
Sandip University, Nashik

Graduating: 2026
